DUE TO THE INCREASE IN INSURANCE COST AND THE NEVER ENDING CHANGES TO INSURANCE COVERAGE, IT IS THE PATIENT/PARENT'S RESPONSIBILITY TO KNOW WHAT THEIR INSURANCE DOES AND DOES NOT COVER.

XRAYS AND FLUORIDE

Xrays and fluoride are a very important part of routine cleanings. X-rays detect much more than cavities. X-rays may be needed to survey erupting teeth, diagnose bone disease, evaluate the results of an injury, or plan orthodontic treatment. X-rays allow dentists to diagnose and treat conditions that cannot be detected during a clinical examination. Fluoride is a vitamin for the teeth to help prevent tooth decay. It is an important part in helping keep a healthy smile.

Insurance usually covers bitewing x-rays once a year and a panorex once every three years. Depending on the insurance, fluoride could be covered twice a year, but the majority only cover it once a year. New patients need to be aware that if x-rays and fluoride were done at another dental office within the last year, the insurance may not cover them if taken in our office and the patient/parent will be responsible for the balance.

Your signature below acknowledges that you have been made aware that insurance may not cover these procedures. You also understand that it is your responsibility to let the office know if there is a chance x-rays and fluoride were done in another dental office.
